**68.** (Previously presented) The method of claim 64 wherein the determination whether to execute said command is also based on an argument of said command.

**69.** (Previously presented) The method of claim 64 wherein the determination whether to execute said command is also based on the geo-location at which said value is stored.

**70.** (Previously presented) The method of claim 64 wherein the determination whether to execute said command is also based on said datum.

**71.** (Currently amended) A method comprising:

receiving a user input at a mobile telecommunications terminal, wherein said user input is for executing a command that reads the value of a remote datum; and determining whether to execute said command based on the geo-location of said mobile telecommunications terminal and on the geo-location at which said remote datum value is stored.

**72.** (Previously presented) The method of claim 71 wherein the determination whether to execute said command is also based on the identity of the user of said mobile telecommunications terminal.

**73.** (Previously presented) The method of claim 71 wherein the determination whether to execute said command is also based on the calendrical time at said mobile telecommunications terminal.

<sup>74</sup>  
**75.** (Previously presented) The method of claim 71 wherein the determination whether to execute said command is also based on an argument of said command.
